Across
5. A management practice used to relieve soil compaction in lawns
8. This fertilizer nutrient makes grass darker green - and it grows faster
11. This type of irrigation head applies a large amount of water over a short time period
12. There are 2 types of this lawn care implement: the rotary- or the reel-type
14. You should leave these on your lawn when you mow lawns
15. This type of weed can grow back every year WITHOUT producing any seed
16. You are more likely to "stripe" a lawn using this type of fertilizer spreader

Down
1. Used for grass ID - the arrangement of the youngest leaf in the grass shoot (rolled or folded)
2. This is a layer of organic matter that can form in Kentucky bluegrass lawns
3. This is a disease of over-watered lawns
4. This insect-like pest can kill lawns in late winter/early spring (dry conditions)
6. This native grass can be planted in Colorado home lawns
7. This is a pesticide used to control WEEDS
9. This wild animal can cause dead spots in lawns (from constant, close feeding and urine injury)
10. These white larvae of beetles feed on turfgrass roots
13. When this nutrient is deficient, turf can become chlorotic (yellow)
