

Amy Lentz

Instructor for Vegetables

Amy Lentz is a Colorado State University Extension agent for horticulture, agriculture and small acreage management in Weld County where she works with residents and local farmers to address their questions and needs as they relate to land management, home horticulture or crop production.

Amy also helps manage the Colorado Master Gardener program in Weld County, educating and helping volunteers to deliver home-based horticultural information to the public.

Prior working for Colorado State University, Amy worked as a research analyst for the University of Kentucky in the areas of fruit and vegetable research, cut flower production, nursery production and seed testing. She also worked as the supervisor of horticultural farming operations at Morehead State University in Eastern Kentucky, teaching students the fundamentals of floriculture, nursery production, orchard management, fruit and vegetable production and landscape management.

She holds a Bachelors of Science in Natural Resource Conservation and Management and a Masters of Science in Plant and Soil Science in Horticulture & Nursery Production both from the University of Kentucky.
